

CO₂ PERFORMANCE LADDER

The CO₂ Performance Ladder

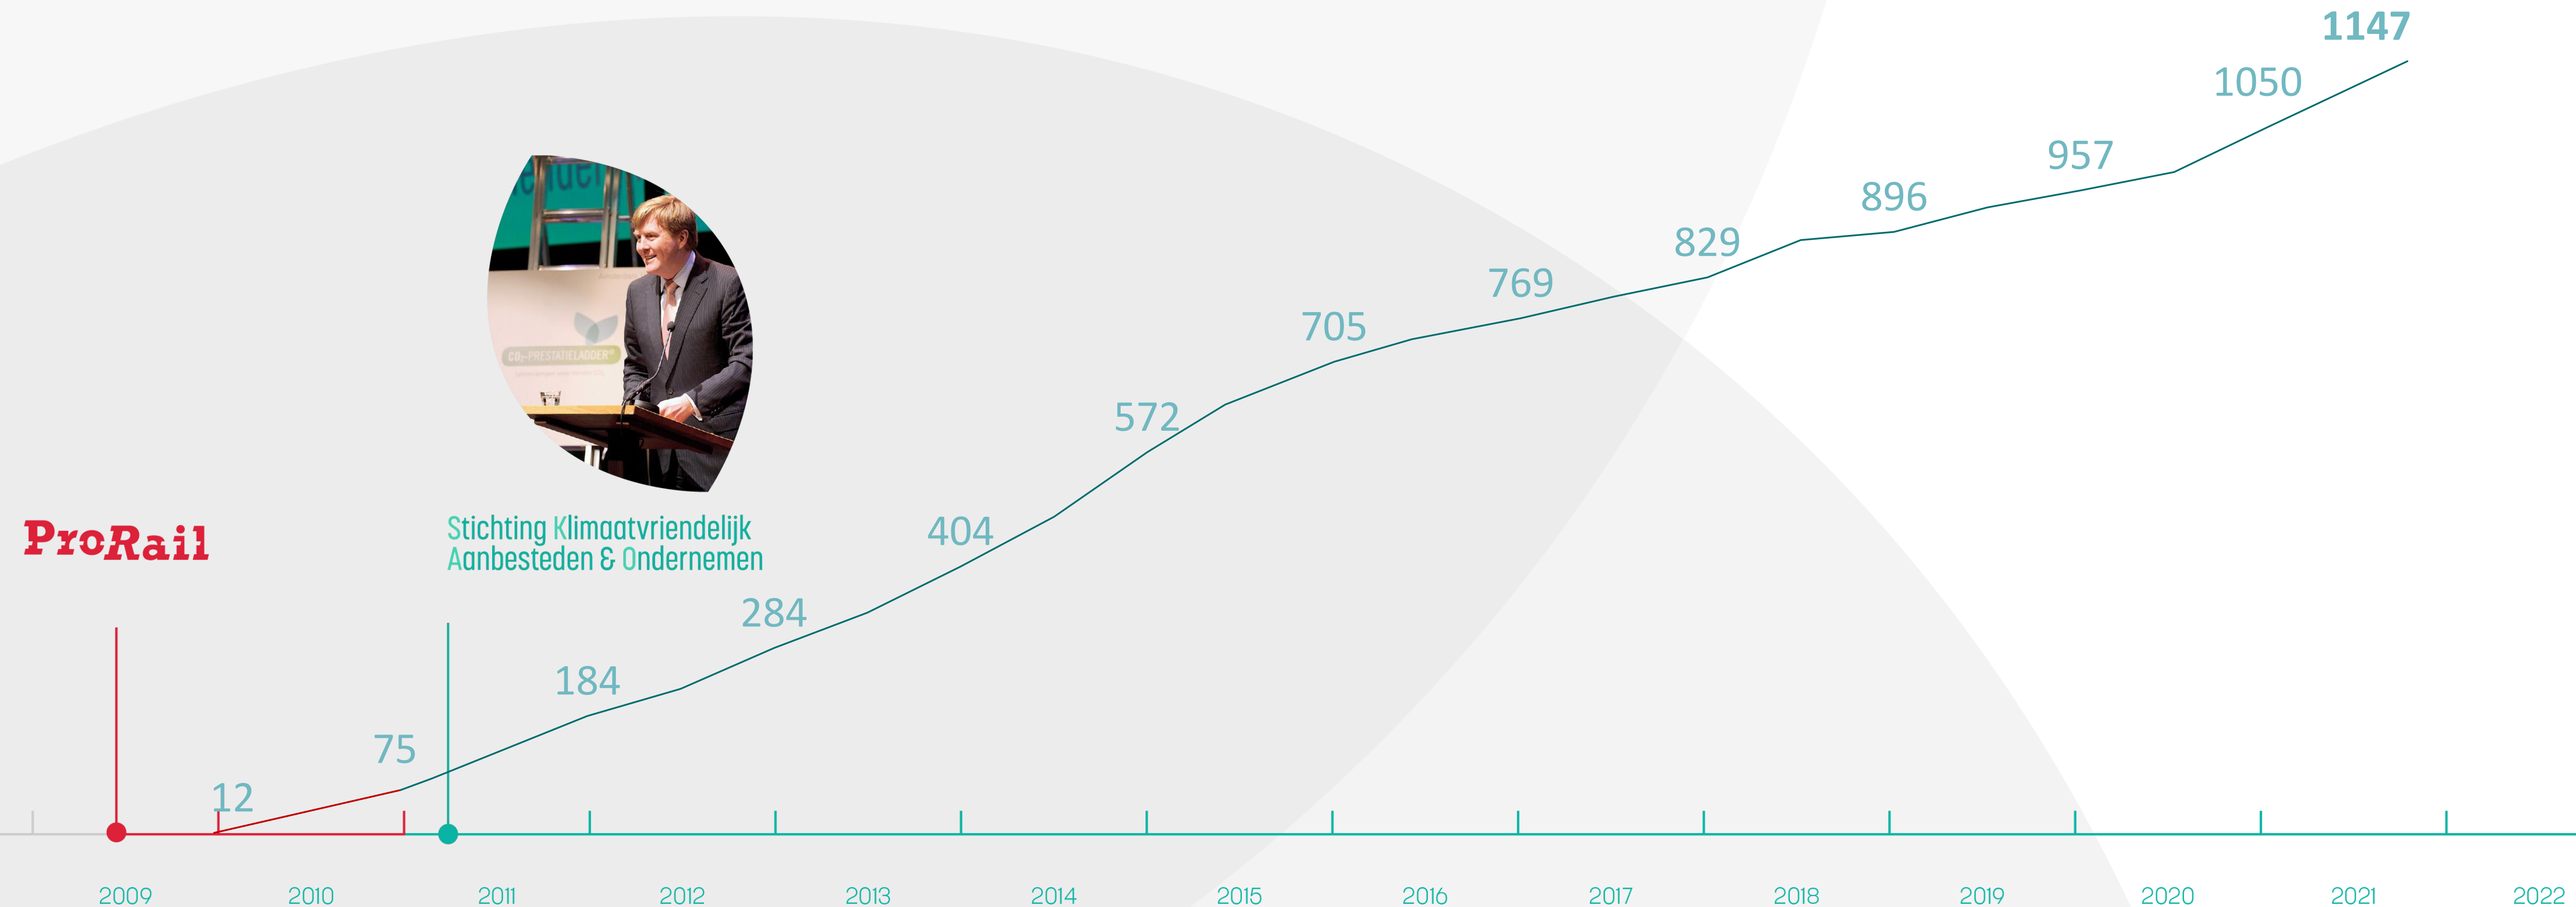

Accelerate carbon emissions reduction
through the Power of Procurement

Maud Vastbinder – Project Manager CO₂ Performance Ladder Europe

SKAO - Foundation for Climate Friendly Procurement and Business

12,5 years CO₂ Performance Ladder

- Standard GPP instrument in NL and B (1200 certificates and >150 procuring parties)
- 75% SME

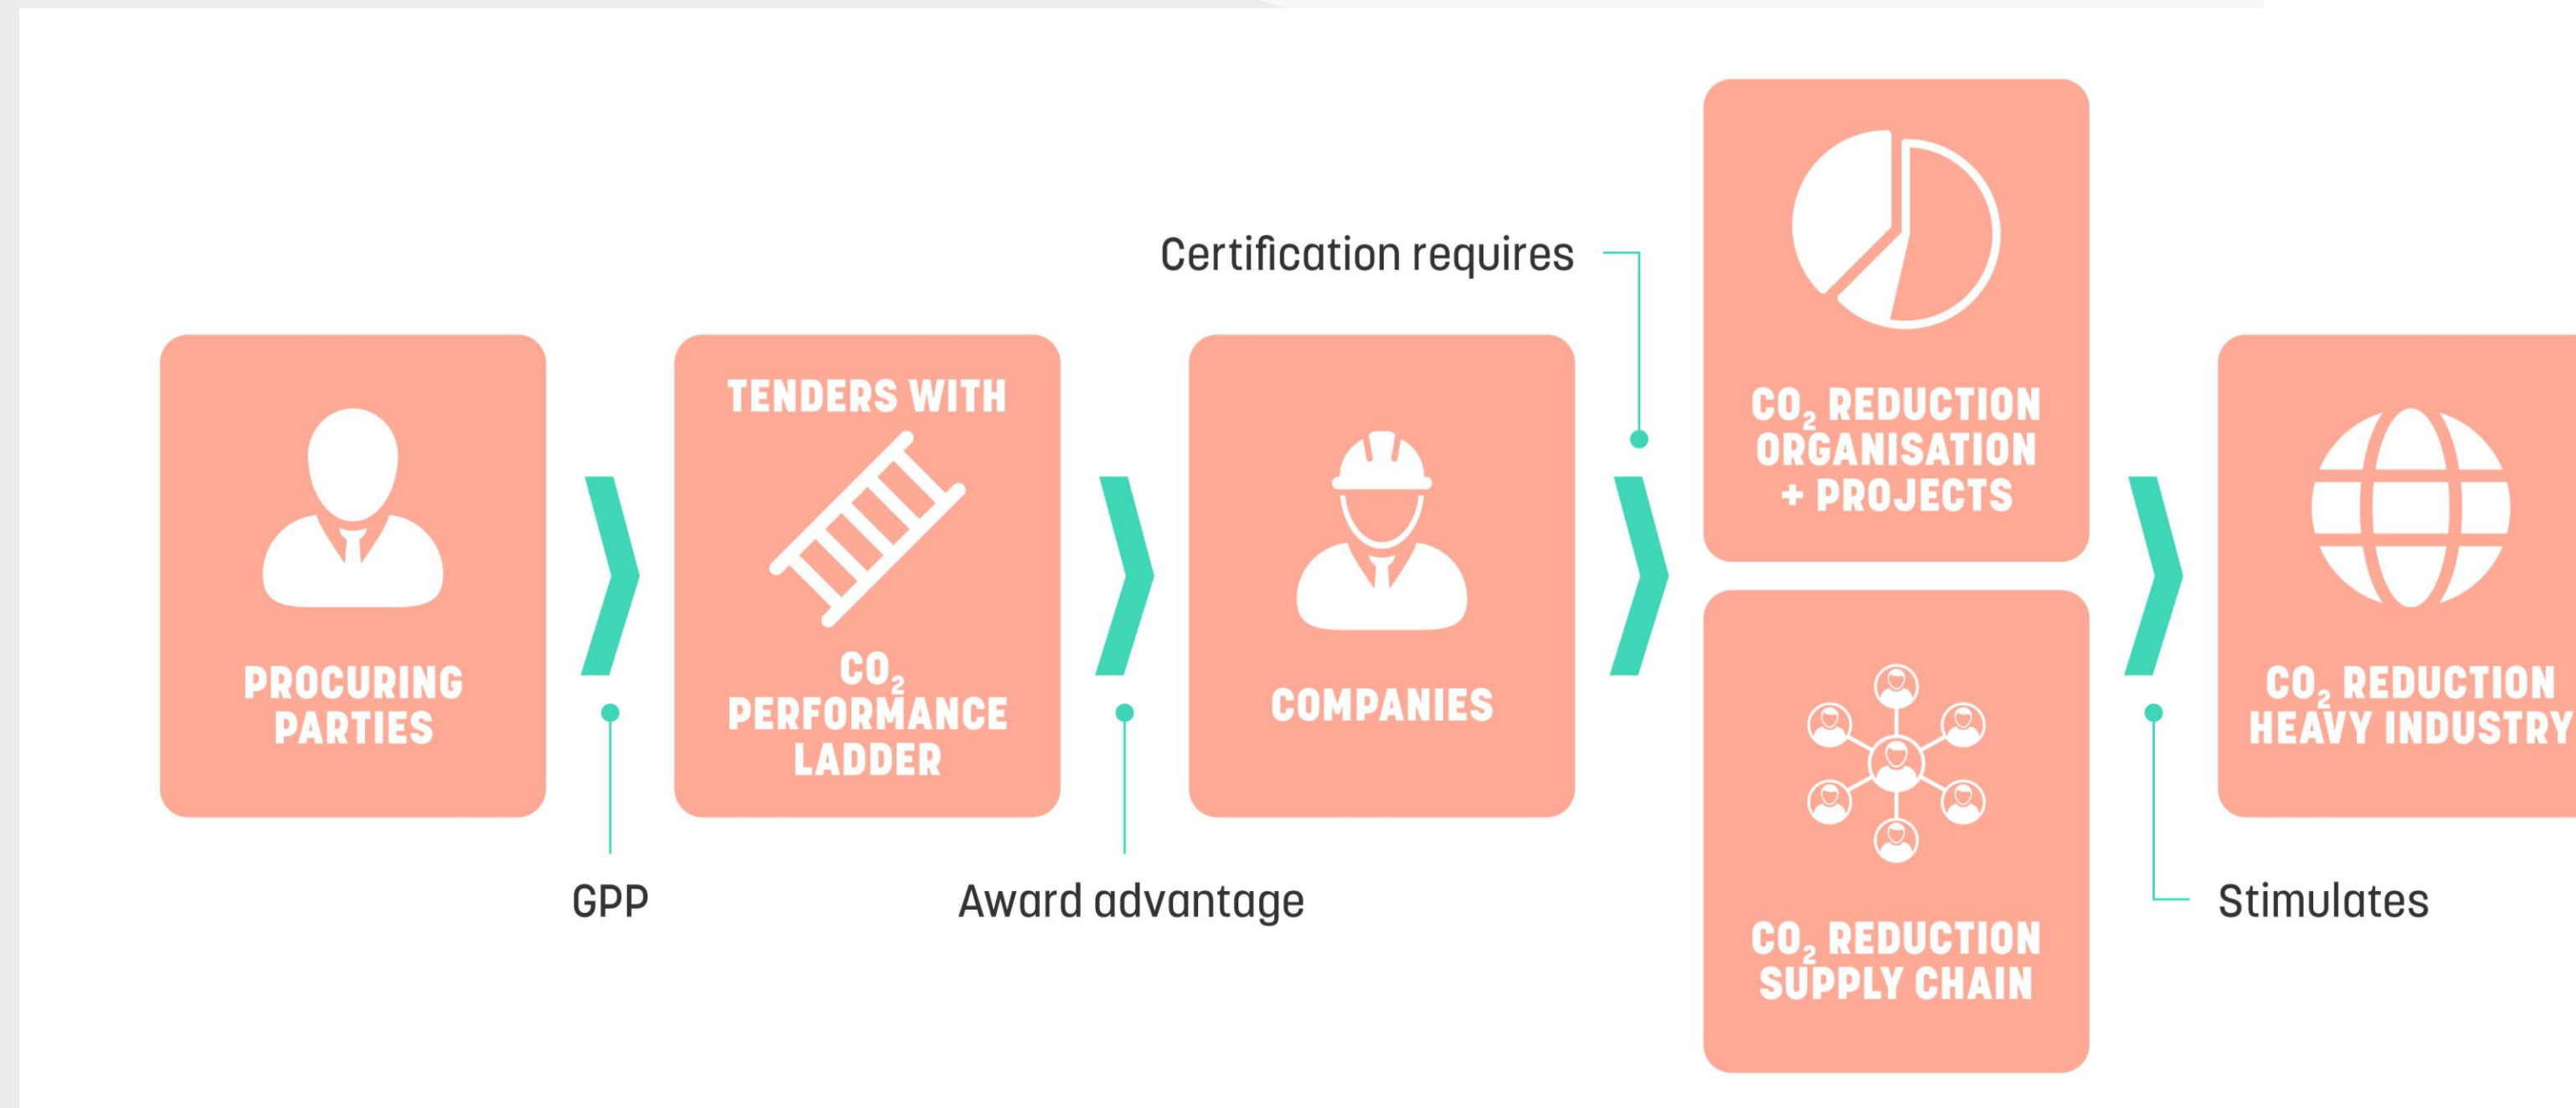

ProRail

Stichting Klimaatvriendelijk
Aanbesteden & Ondernemen

Theory of Change

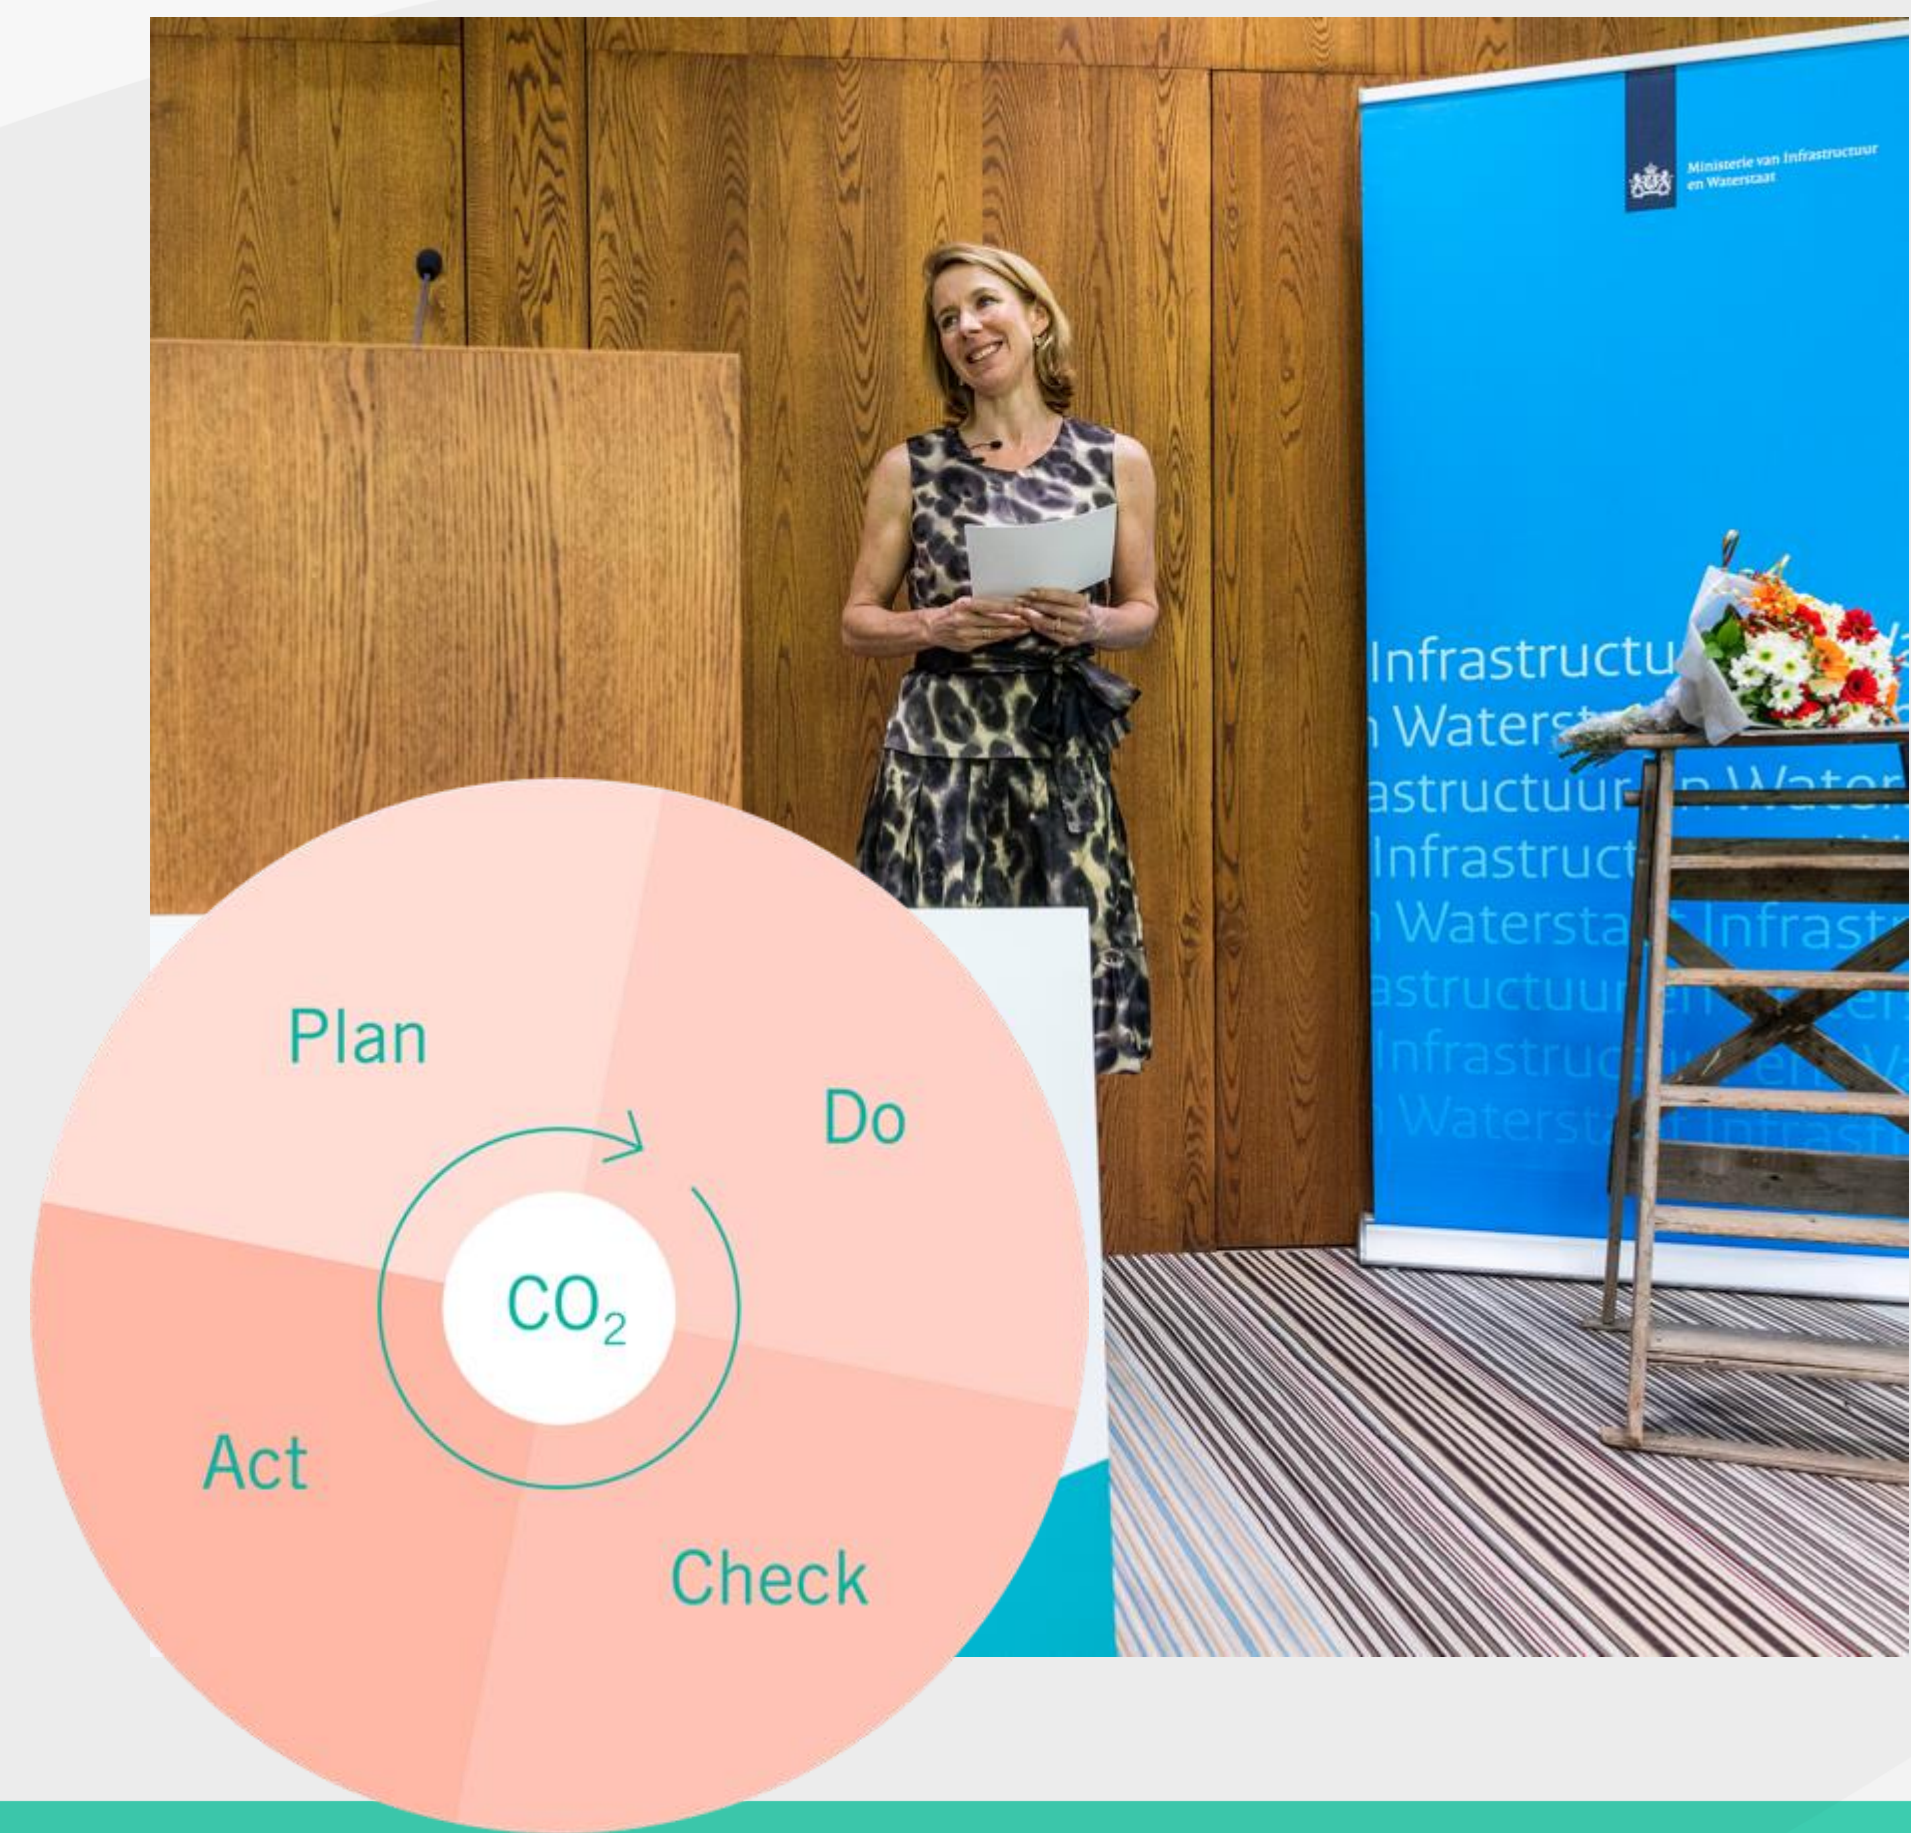

The CO₂ Performance Ladder is a practical instrument that uses the Power of Procurement to drive change by stimulation (award advantage in tenders) structural CO₂ reduction through the implementation of an effective CO₂ management system

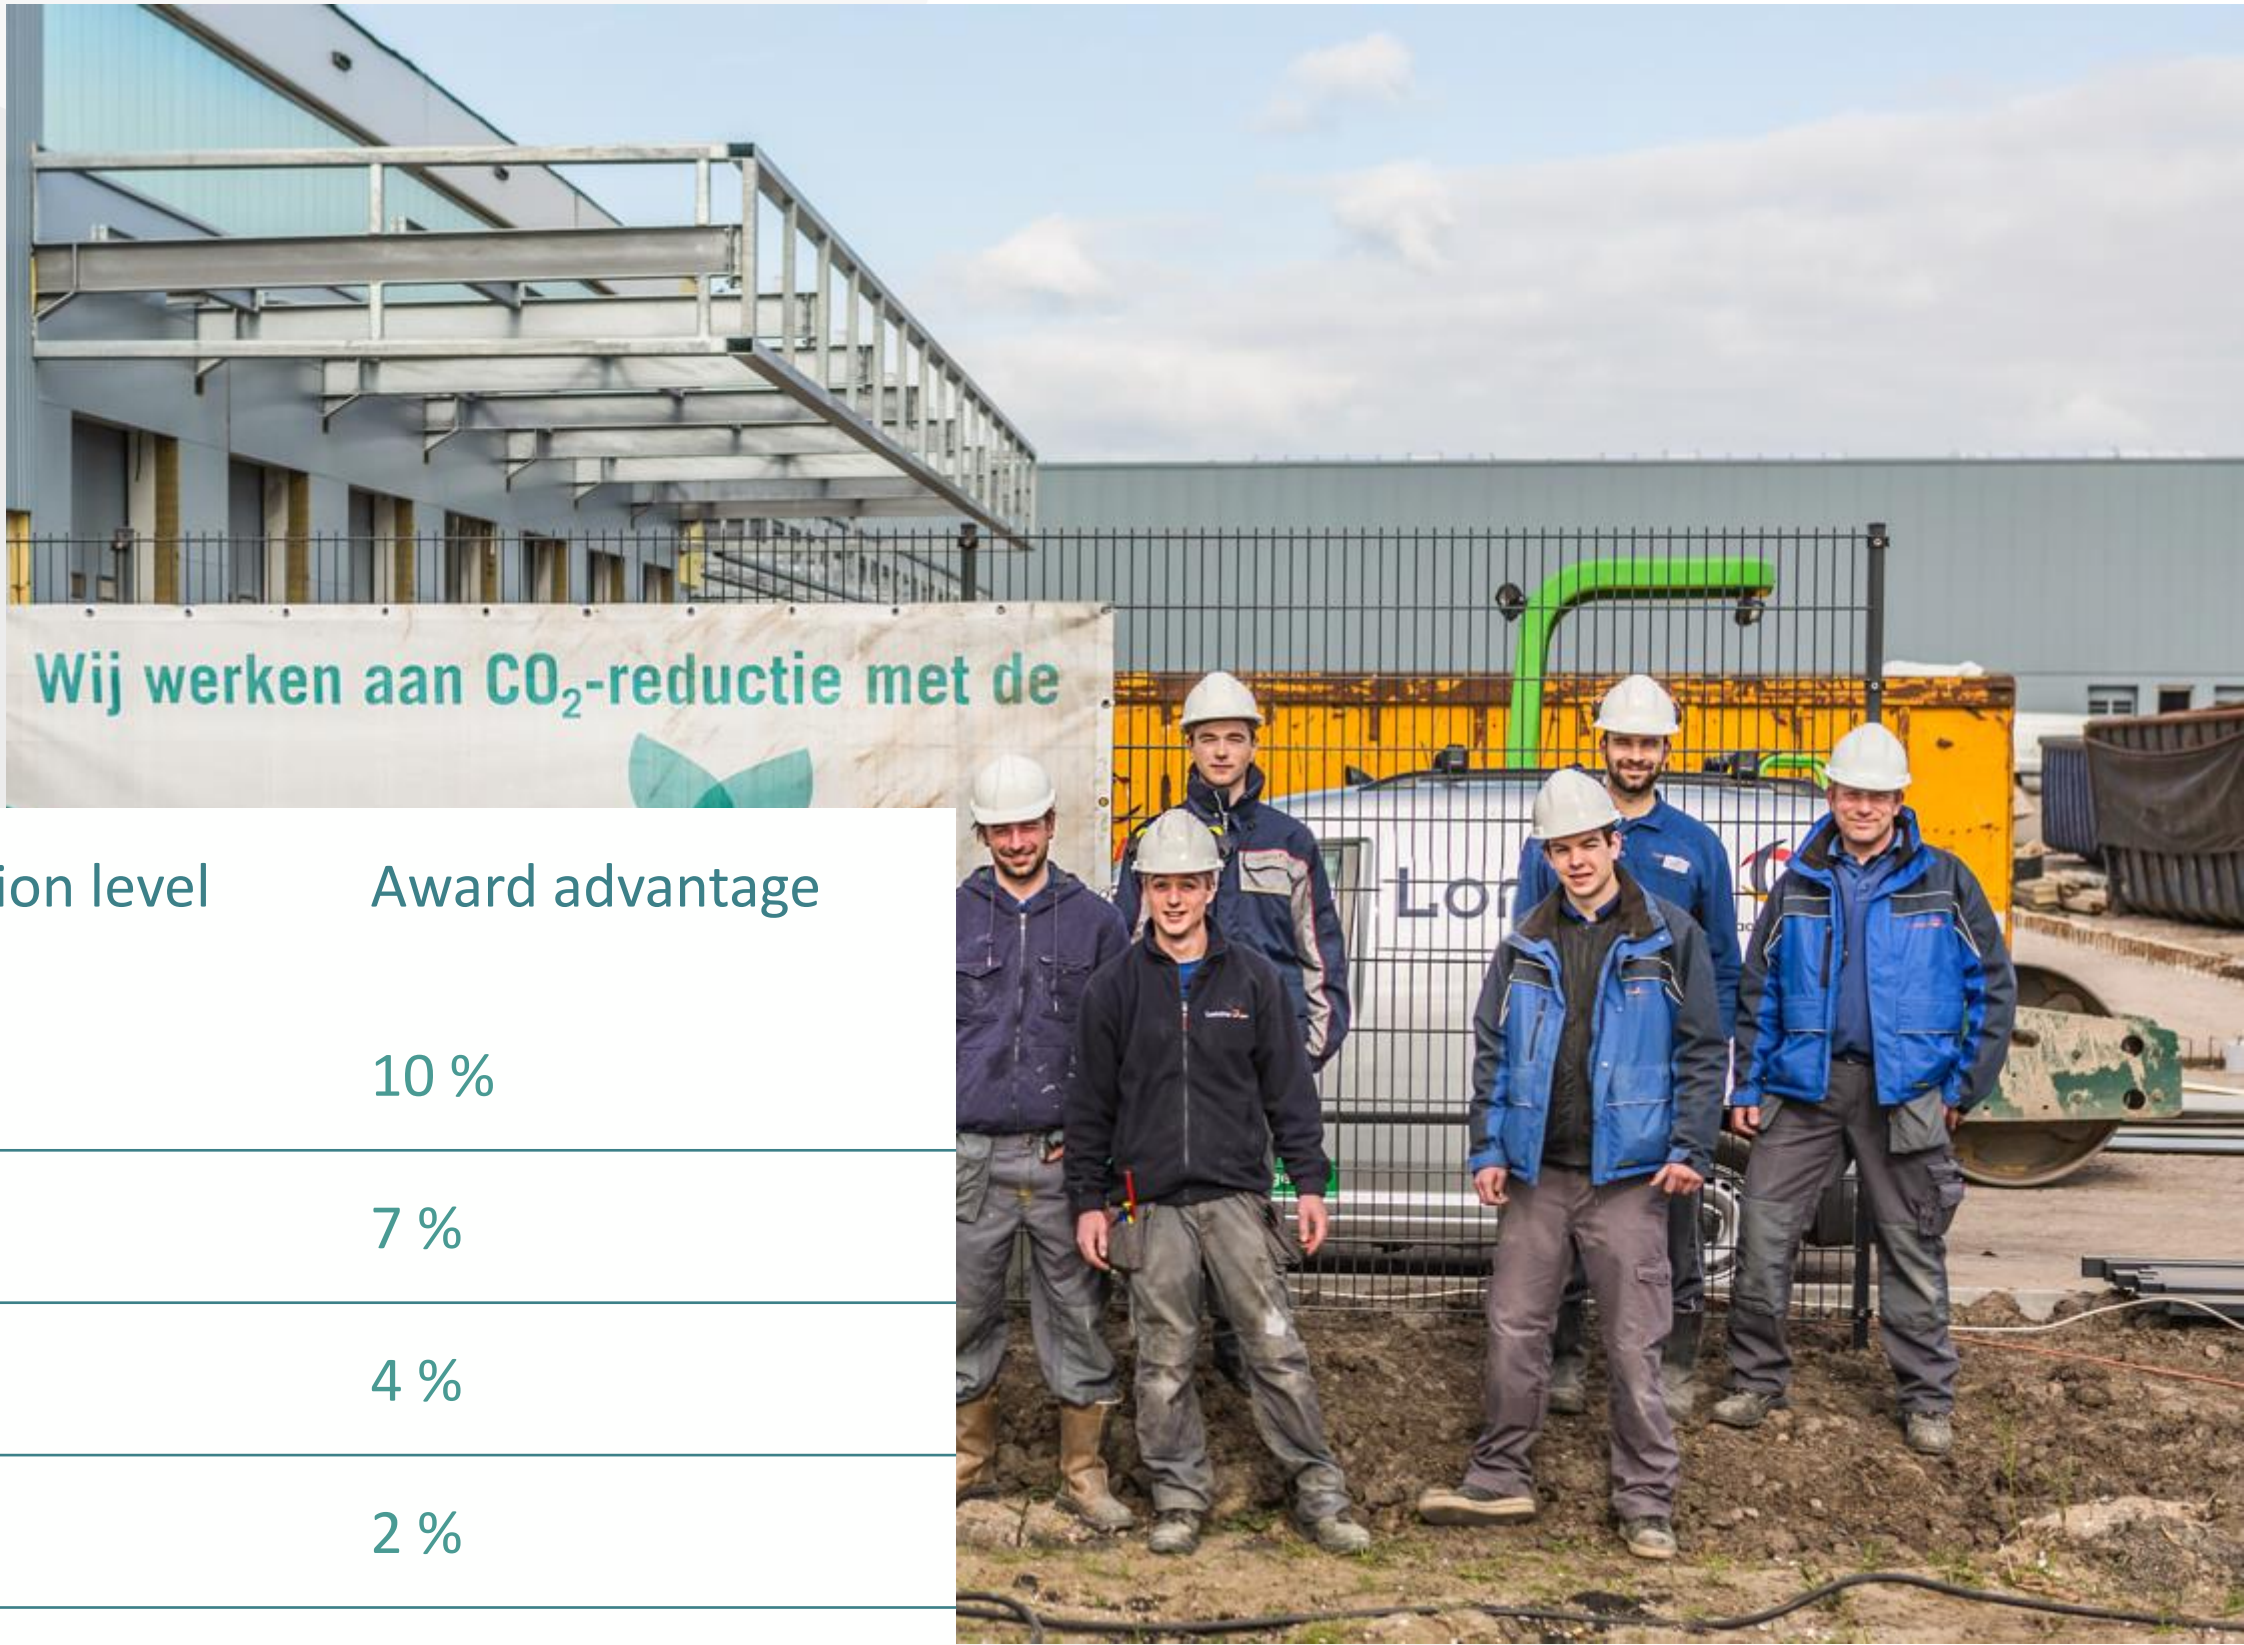

CO₂ reduction is rewarded with award advantage for the bidding companies.
The higher the ambition level of the company, the higher the award advantage.

What is the CO₂ Performance Ladder?

CO₂ management system

GPP tool

CO₂ management system

- Certified CO₂ management system (annually assessment)
- Focus on energy savings and carbon reduction
- Renewable Energy
- Efficient use of materials
- Low carbon materials
- Cultural shift in organisation: Carbon reduction in DNA
- Supply chain collaboration
- Effective: carbon reduction twice as fast as average
- Low carbon innovation
- Competitive advantage in tenders

GPP tool

- Effective: Power of procurement mobilises markets
- In accordance with European procurement directive
- Most used sustainable procurement instrument in NL
- 1 tool, 1 language
- Contract management: assessment of companies
- Directs investments towards low carbon economy
- Of-the-shelf, easy to implement
- Promotes Circular Economy
- Named best practice by OECD
- Implemented in Belgium on the request of companies

Foundation for Climate Friendly Procurement and Business

Stichting Klimaatvriendelijk
Aanbesteden & Ondernemen

- Independent Foundation, not-for-profit
- Owner, administrator of CO₂ Performance Ladder
- Development and implementation of both certification scheme and procurement instrument
- SKAO encourages CO₂ reduction with the CO₂ PL with the aim of realizing a climate neutral economy
- We do research, share knowledge and are the heart of a large network

What does a certified organisation have?

Insights
(verified carbon footprint)

Transparency
And communication

CO₂ Management system
(yearly assessed by accredited 3rd party)

Ambitious reduction targets

Innovation and
collaboration

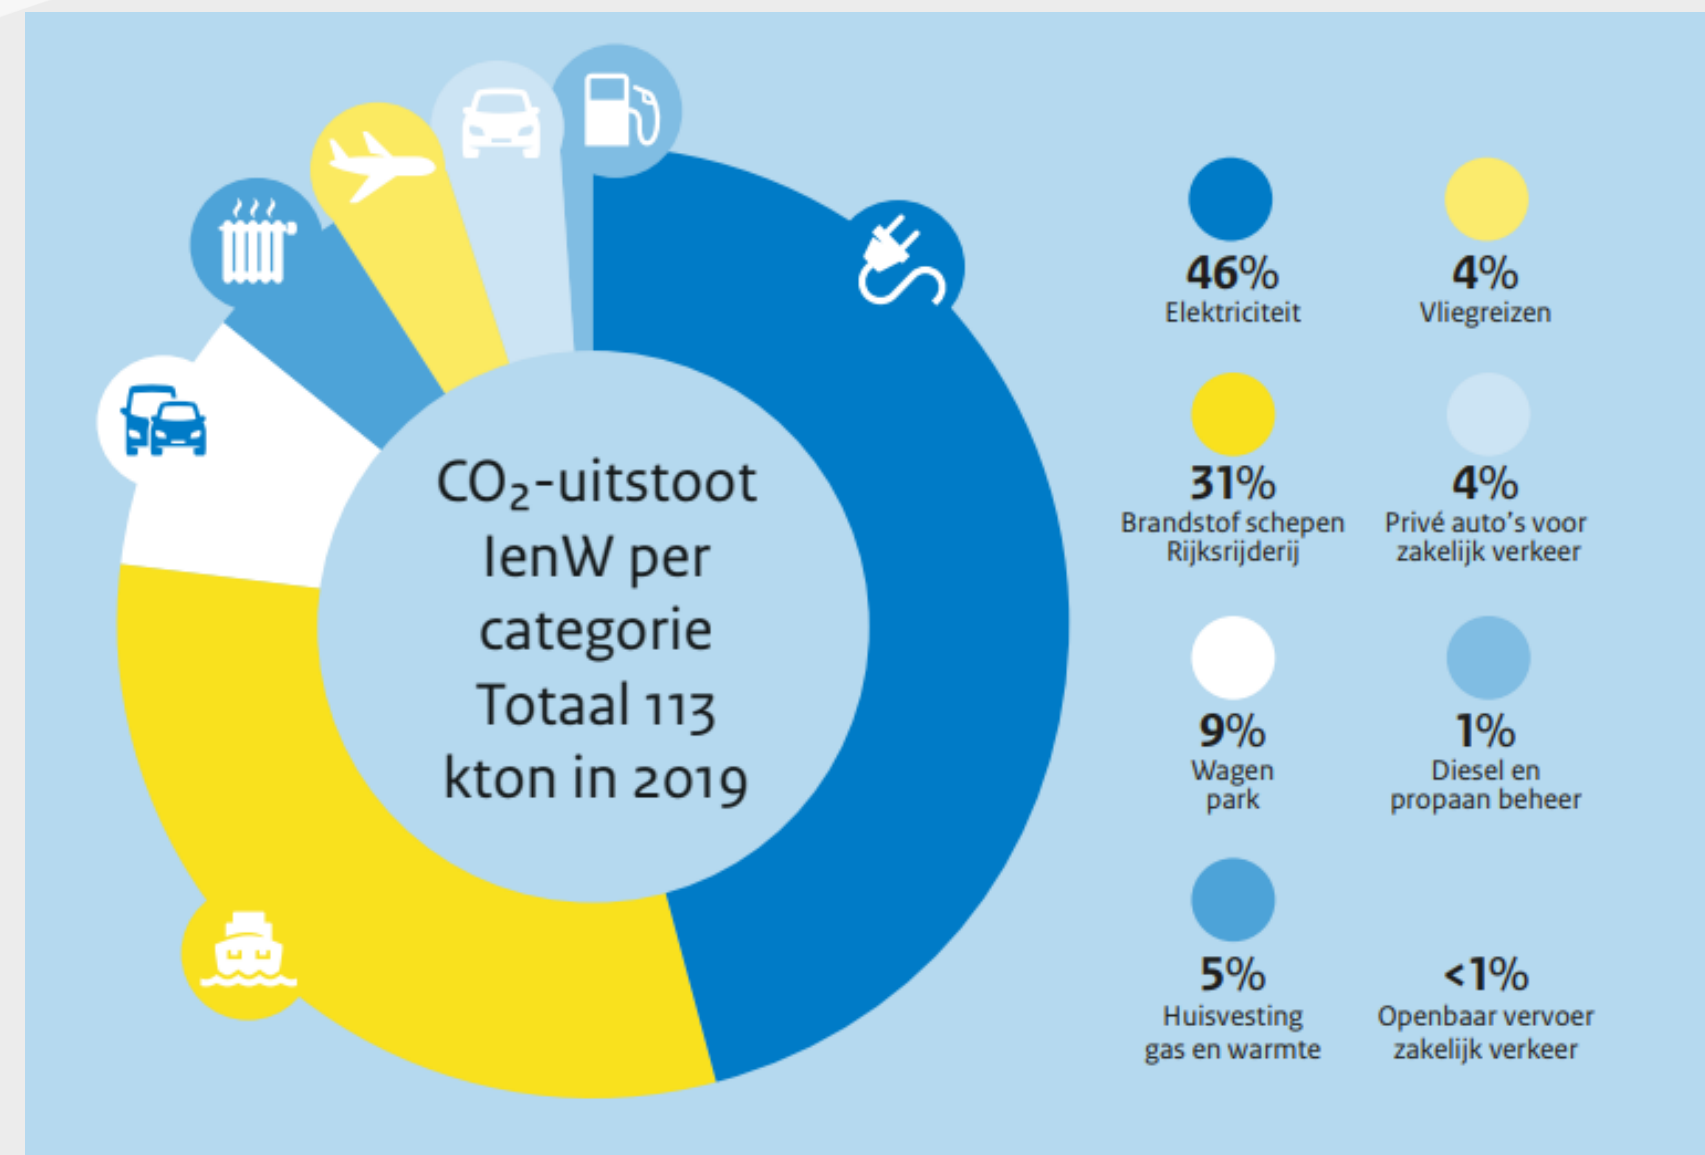

What does a certified organisation have?

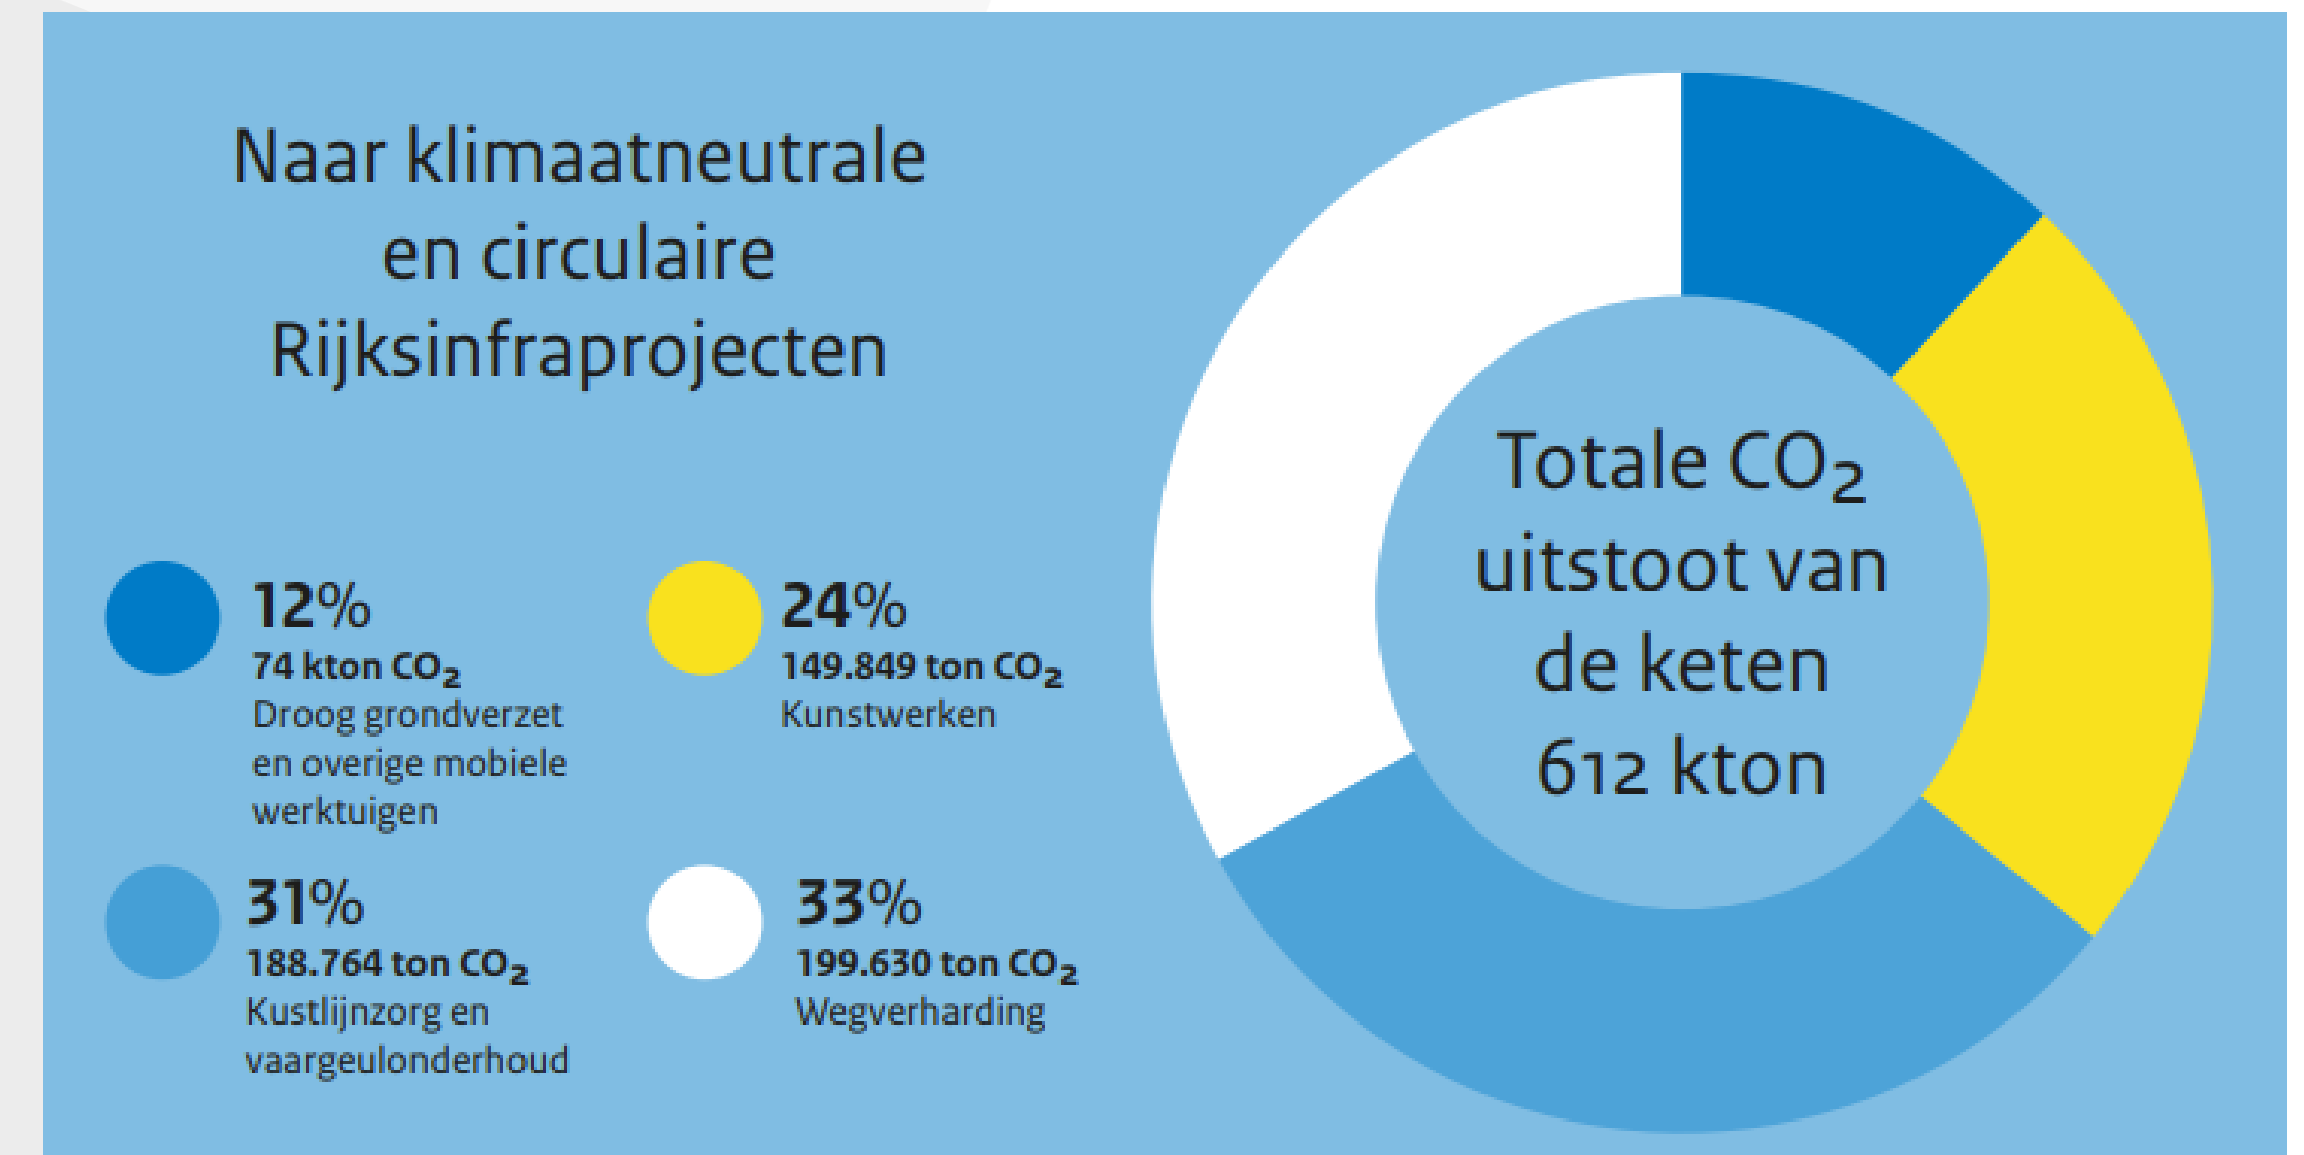

The Ministry of Infrastructure & Watermanagement

CO2PL Level 3: scope 1 and 2

CO2PL Level 5: Procurement (part of scope 3)

The ministry has this insight and they have reduction targets (and it's published) because they are certified
